

Men aged 65+

A simple scan can tell you if you have an abdominal aortic aneurysm

This is an enlargement of the main blood vessel in the abdomen and if left untreated it can be fatal

Men aged 65+ are most at risk

NHS screening invitations will be sent to men turning 65 this year and those over 65 who haven't previously been screened can request a scan

Contact the Black Country Abdominal Aortic Aneurysm (AAA) Screening Programme on **01384 321125** at aaa.screening@dgh.nhs.uk or visit www.nhs.uk/aaa
